Enter the above specifications for a 350 x 250 Layflat or flushmount Album. You can use the same size for 297 x 210 layflat and/or flushmount albums.

300 x 300 & 210 x 210 Layflat and Flushmount Albums

The screenshot shows the 'New Project' dialog box with the 'Choose Album Specifications' section. The 'Album Company Preset' is set to 'Custom'. The 'Saved Presets' section shows a dropdown menu with '[New Preset]' and buttons for 'Save Preset' and 'Delete Preset'. A modal dialog box is open, showing 'Large Square' as the selected preset, with 'Cancel' and 'OK' buttons. The 'Output Dimensions' section is highlighted with a blue box, showing 'DPI: 300' and 'Units: px'. The 'Trim' section is also highlighted with a blue box, showing 'Left/right: 24 px', 'Top/bottom: 24 px', and 'Inside: 0 px'. The 'Safe Zone' section shows 'Left/right: 0 px', 'Top/bottom: 0 px', and 'Inside: 0 px'. The 'Layout Type' section shows 'Starts with: Full spread', 'Ends with: Full spread', and a checked box for 'Include full spread templates'. A 'Next' button is at the bottom right.

Cancel Change Quality Export

Once you are ready to export click on 'Change Quality'

Change 'JPEG output quality' to 98. This is done to reduce the final output of your file size without adversely affecting the quality. At 100% it could take you up to a day to upload files. At 98% this should be done within 15-20 mins (totally dependant on your internet speeds).
